Coffee Roasters R120

R&R R120 120kg batch capacity commercial coffee roaster meets the requirement of artisan coffee roasting for high volume production facilities. This model is perfect for a large industrial production. It has a fully professional profile and a heavy-duty design for quality roasting and reliable operation. R120 coffee roaster has a capacity of 120 kg per batch.

There is the possibility to roast and cool at the same time as it has separate motors for all function. R120 commercial coffee roaster roasts continuously while cooling is done outside the drum. It is easy to load green beans into the hopper with fast load design of green bean loader.

R120 has a cyclone collects the chaffs that comes from the roasted beans. The beans that come into the cooling bin are separated from the chaffs before drop and after cooling down can be processed immediately. You don't have to clean the chaffs out of the roaster between roasting, because the cyclone is external. It is also easier to clean the coffee roaster when using an external cyclone.

R&R Roaster a You can roast sequentially without brake. Chaff collector needs to be clean after number of roasts.nd Roaster R120 coffee roaster has been designed for optimal and high efficiency heat transfer and distribution. Our sophistication on coffee roasting brings the unique drum design which has homogenous, constant and stable bean roasting at each batch.

R120 has industrial motors and equipment for long lasting and heavy-duty roasting process. You can run the machine for 24 hours 7 days.

Low Nox Premix Burner operates with the lowest emissions. and highest performance of available burners. Power and energy are worldwide concerns for environmental health. Five global environmental problems exist: climate change, acidification, eutrophication (atmospheric deposition, urban air quality, and tropospheric ozone. NOx is one of the important pollutants in the above environmental problems. R120 is equipped with the most efficient premix gas burner. Our burner is a clean heating source, providing maximum efficiency in gas burning and minimal emissions of Carbon Monoxide. It is safe, economical and stable, the flame control parameters allow complete control over your roast. Digital control unit allow you to increase or decrease the flame (thermal power).

R120 is equipped with USB Modbus data-logging connection. Ready for Artisan. It has thermocouples to record bean temperature and exhaust temperature.

Control panel has digital thermostat for both drum and exhaust thermocouples to set and monitor temperatures.

Dimensions

Sizes w x l x h : 345x370x355cm

Exhaust pipe diameter : Ø219,1mm

Electrical Service Requirements

Voltage & Frequency : Three Phase 380 / 400 50hz 60hz

Power : 14kw/h

Electric Current (Ampere) : 35A

Airflow

Exhaust airflow :650m³/h

Cooler airflow :900m³

Capacity

Batch Size : 120kg/batch

Production : 480kg/h

Fuel

Fuel type : Propane, LPG, Natural Gas, Electricity

Gas pressure requirement : NG 20Mbar – Propane, LPG 30mbar

Source Gas Pressure : 1-4bar

Data Logging

Artisan Connection : USB

Gas consumption

Thermal Power	Gas Consumption		Gas Pressure	
	G20	5,21-0,68	m3/h	20mbar
13-100 KW/h	G30	7,78-1,01	kg/h	30mbar
	G31	7,50-0,95	kg/h	37mbar
